## Data Analysis Engineer

PaneraTech, Inc., is looking for a self-driven, and motivated data analysis engineer to support our data analysis team in Ankara. This position requires persistent/disciplined character, basic signal processing knowledge along with MATLAB programming skills.

### Company

We are a technology development company that solves very challenging industrial problems using our innovative sensor solutions and IoT software infrastructure. Our specific core technologies include industrial radar based sensor solutions and data analytics, accelerating industry 4.0 revolution.

### Job Description

#### Responsibilities:

- Be a part of the team responsible for accurate maintenance and delivery of data analysis results for PaneraTech globally
- Review the sensor measurements to ensure accurate results
- Effectively and efficiently communicate/present his/her findings

#### Requirements

- Graduates of Electrical/Electronic Engineering, Telecommunications Engineering, Computer Engineering, Mechatronics Engineering, and similar relevant departments
- **Basic signal processing/analysis** knowledge (experience is welcome)
- **MATLAB** programming skills
- Competent with **Office tools**
- Strong analytical skills
- Excited by and motivated by technical challenges
- Demonstrable ability to communicate effectively, **both orally and in writing in English**
- **No military obligation or at least 2 years of delay** for male candidates

**Location:** Ankara, Turkey

Interested candidates should send their applications by including **CV and transcripts** along with other records they find appropriate to [suat.bayram@paneratech.com](mailto:suat.bayram@paneratech.com).
